SUBJECT: 1994 PUMPER TRUCK

We have received three (3) bids for our 1994 pumper fire truck. The lowest bid did not meet the specifications that we sent out. So, due to the process of elimination, next low bid is Firemart. They manufacture Quality Apparatus, which we have visually inspected. We have also talked with several other fire departments that have purchased Quality.

Since Firemart meets our specifications, We, the Oconee County Fire Commission respectfully recommend that the bid by Firemart be accepted. Thank you for your consideration of this matter.

Dear Mr. Crain:

In pursuing the completion of the preliminary hydrogeologic study for the proposed landfill site, it has become evident that aerial photography of the site is necessary in order to continue the Subtitle D Landfill permitting process. Topographic mapping from aerial photography is the least expensive method of obtaining site topography. The photography must be obtained before the trees and other vegetation begins to bloom. This requires that the photography be taken prior to March 15. the immediate survey needs are to:

- (1) Authorize paneling of the site to establish points which can be seen from the airplane during photography.
- (2) Authorize photography of the site. The cost for items 1 & 2 above is estimated to be about \$2,200.00.

After photography is obtained, the following tasks are required to complete the mapping:

- (1) Survey the panels to get horizontal and vertical control.
- (2) Develop topographic mapping from the photography of the 312 plus acre landfill site.

The cost for the tasks above is estimate to be between \$10,000.00 and \$15,000.00.

Sincerely,
