Regarding the Pine Street Complex Project

December 21, 1999

SUMMARY OF FINDINGS

We find that the total cost of the Pine Street Administrative Complex is estimated to be approximately \$2,650,000, or \$58.31 per square foot, for the acquisition, construction, renovation and administrative oversight effort required to prepare the facility for full utilization. The project is approximately 85% completed at this time, and staff members involved with the project feel that it will be completed within the boundaries of the budget requirements.

In response to County Council's request that we not only include the actual hard costs paid to outside vendors and contractors, but also include estimates of hourly costs for employee time, we submit that the total above **includes** approximately \$220,000, which represents the following *significant* areas of internal costs in the report:

County Engineer – The County Engineer estimates that approximately 15% of his time since the purchase of the property is allocable to the project. We have included personnel and related fringe benefit expenses to represent that estimate.

Purchasing Department – The County Purchasing Agent estimates that 8.5% of her department's time has been required for the administrative effort required. We have included personnel and related fringe benefit expenses to represent that estimate.

Building Maintenance Department – The Public Buildings Maintenance Supervisor estimates that, over the life of the project, since inception, an average of 25% of his department's human resources were expended in work associated with the renovation effort. We have included personnel and related fringe benefit expenses to represent that estimate.

Road Department – The Roads and Bridges Superintendent extracted the hours worked on this project from the detailed daily logs, which he maintains. Also, he noted the equipment utilized on the project by those employees. We have included personnel and related fringe benefit expenses, as well as an estimate of equipment cost to represent those circumstances.

We have available the detail records and computations to discuss with you at your pleasure, and will await your further request.
