K. Testing: The County will follow the latest edition of the “SCDOT Standard Specifications for Highway Construction” and subsequent supplemental specifications for testing of various stages of the construction process. However, the number of tests may vary from SCDOT at the County’s discretion. All tests shall be performed by qualified personnel. The costs of any testing that is requested by the Contractor(s) shall be paid by the Contractor(s). A report of each test shall be supplied to the County. Testing done at the direction of the County shall be paid by the County. Tests to be performed will be:

- **Compaction Tests** - If a compaction test does not meet specifications, further compaction tests shall be taken to determine the affected area. The substandard sections shall be removed and replaced per specifications at no cost to the County. If compaction tests that are requested by the County should fail, the Contractor(s) shall be responsible for the cost of the test, removal of material and replacement of material to County specifications.
- **Core Samples** - If a core sample does not meet specifications, further core samples shall be taken to determine the affected area. The substandard sections shall be removed and replaced per specifications at no cost to the County. If core sampling that is requested by the County should fail, the Contractor(s) shall be responsible for the cost of the test, removal of material and replacement of material to County specifications.
- **Nuclear Gauge Testing** - If a nuclear gauge test does not meet specifications, further nuclear gauge tests shall be performed to determine the affected area. The substandard sections shall be removed and replaced per specifications at no cost to the County. - **Proof Roll Testing** – Proof roll testing on sub-grade and base is mandatory. It shall be monitored by the County Inspector and the Contractor’s Representative. The County shall be given 24 hours notice in order to schedule a testing representative. Proof roll testing shall be viewed as incidental and shall have no cost associated with the tests.

L. Asphalt Cost Indexing: The cost of asphaltic materials will be indexed to the SCDOT liquid asphalt index with a base index date of September 1, 2017. The change will be reviewed once a month and will be applied, if the difference is greater than 5% since the last adjustment. The review date will be the first calendar day of each month, once one full month has passed after the date the contract has been let. The adjustments in the unit price per ton for Liquid Asphalt Binder (LAB) will be made based on changes in the Monthly Liquid Asphalt Index Price as shown at: <http://www.scdot.org/doing/monthlyindexes.asp>. The adjustments in the unit prices of Surfacing and Intermediate will be made based on changes in the Monthly Liquid Asphalt Index Price using the same site. Changes will be calculated in Unit Price / Ton for Surfacing and Intermediate. The method of calculation will be as follows: The amount of change will be in brackets of 5%. From the DOT Index’s right hand column (+/-) UNIT PRICE / TON for LAB take the change in cost value for that amount of change. The change in cost value will be multiplied by the percent as documented in the Daily Report of the Asphalt Plant Inspection (typically around 5.9% for surface Type C, or 5% for intermediate). The resulting cost value will be added to the bid unit cost of asphalt per ton.

Example: Actual Initial Asphalt Price January 1, 2014 (Bid Price) = \$72.00, LAB jumps 5.0% from the base month, for a 5-10% change the (+/-) UNIT PRICE / TON for LAB is \$29.38 on the August 1, 2014, LAB index.

$$\text{Calculation: } (\$29.38 \times 5.9\%) + \$72.00 = \$73.73$$

This gives the unit cost for that month’s billing: \$73.73 cost per ton for Type C asphalt.

Clear, concise, detailed documentation of all adjustment calculations shall be provided with the monthly bill for verification.

- M. Reports:** The Contractor(s) shall employ certified personnel and equipment to prepare daily reports that provide information regarding plant mix, percentage of liquid asphalt per ton, bitumen content, gradation and marshal stability. Each report shall verify in writing that the mix meets the requirements of this Contract. Oconee County will be supplied with a copy of this daily analysis report. No pay requests will be approved prior to submission of all required reports.
- N. Asphalt Mix Testing:** Oconee County reserves the right at its discretion to employ a qualified independent testing agency to perform testing at the plant site, using Contractor's equipment, at no additional cost to the County, to verify that the specified mix design is being met. If Oconee County exercises its right to employ said qualified independent testing agency and the test indicates that the specified design mix is not being met, the Contractor(s) shall reimburse the County for the fees charged by the independent testing agency. If the specified design mix is being met, the County shall pay the fees of the independent agency.
- O. Weather and Surface Temperature Restrictions:** Asphalt mixture shall not be applied when the existing surface is wet or frozen. The placing of asphalt surface courses (including sand asphalt surface courses) shall not be permitted during the months of December, January and February except with written permission of the Roads and Bridges Manager. For all other mixtures, the existing surface temperature for the placement of asphalt mixtures shall be in accordance with the Table 0-1:

Lift Thickness (inches)	Minimum Surface Temperature (degrees F)*
1.0 or less	55
1.1 to 2.0	45
2.1 to 3.0	40
3.1 to 4.5	35

*Surface temperature to be measured with handheld infrared non-contact thermometer with no interference from artificial heat.

- P. Asphalt Temperature:** Deliver the Hot Mix Asphalt to the spreader at a temperature within 20° of the temperature from the plant in accordance with Section 401.4.17 of the SCDOT Standard Specifications. (No less than 275° F.)
- Q. Punch List:**
- Punch List to Release Retainage:** The final action taken on each road shall be thorough inspections of the completed job by the Roads and Bridges Manager. The Roads and Bridges Manager will inspect the project and list any deficiencies. The list shall be turned into the County Roads and Bridges Office for coordination and tracking of corrective actions. Retainage will be released only after corrections are completed and are accepted by the Roads and Bridges Manager.
 - Punch List to Release Warranty:** One month prior to the end of the warranty period, the completed project shall be reviewed again by the Roads and Bridges Manager and another list of any previously identified and/or new deficiencies found will be presented to the Contractor(s). Within seven calendar days after receipt of the final punch list, the Contractor(s) shall respond with a list of remedies and a schedule for repairs for approval by Oconee County. The warranty shall remain in effect until all punch list items are completed.
- R. Riding Surface Requirements:** When the Roads and Bridges Manager determines that the pavement does not have an acceptably smooth ride, the Contractor(s) shall correct such deficient

sections without additional compensation. Oconee County may withhold payment for the asphalt (or a portion thereof) until the deficiencies have been corrected, and the surface provides an acceptably smooth ride. In no case will the asphalt have an artificial heat source over 175°F applied to the pavement. Once the road has been presented to the County as complete, if smooth riding surface deficiencies are identified, the County shall not be charged additional monies by the Contractor(s) for labor, equipment or materials necessary to correct the surface.

Should the Contractor(s) elect not to correct said deficiencies, the County shall estimate a value needed to repair the deficient work and deduct additional monies from the contract, over and above the contract's retainage.

- S. Payment for Work Performed:** Quantities listed on the Bid Forms are preliminary estimates only and are subject to change based on actual field conditions and funding availability. Therefore, the County does not guarantee the Contractor(s) shall be assigned work equal to the quantities listed in the estimates. The contract(s) shall be based on a Lump Sum price and shall be viewed as a Not-to-Exceed cost to construct and pave roads on the Bid Forms. The unit cost pricing shall be used for monthly progress payments (that will be based off the percentage of work completed) and change orders. Monthly progress payments shall be approved according to the quantities certified by the Contractor(s) and accepted by the Roads and Bridges Manager. The payment for quantities shall be based on the percentage of work completed by using estimated and actual quantities. **Any work rejected by the County for non-conformance to the specifications will not be eligible for payment.** If the Contractor's progress is judged to be delinquent or portions of the work are defective, the County reserves the right to withhold an additional portion of the payment, over and above retainage. The total amount withheld will be sufficient to cover anticipated liquidated damages and/or the cost to correct defective work.
- T. Change Orders:** All change orders must be approved in writing. Any work not listed in the specifications or plans (as work methods vary greatly) and deemed incidental to work that is outlined in the specifications or plans shall not be eligible for payment. Any additional work done without written consent will not be eligible for payment. All change orders will be based upon the unit prices given in the Bid Forms. (See also Page 8, Number 22)
- U. Compliance:** Should the Contractor(s), in the opinion of Oconee County, fail to comply with any requirements of these specifications the Oconee County Roads and Bridges Manager may stop work and delay work until such requirements are satisfactorily met.

- 9. BASE BID REQUIREMENTS (ROADWAY CONSTRUCTION):** All specifications for the road work are contained in the South Carolina Department of Transportation Standard Specifications for Highway Construction (2007 Edition) which are available at the following link: <http://www.scdot.org/doing/constructionletting.aspx> and the items listed below, which are available as PDF files on the following website: <http://www.oconeesc.com/Departments/KZ/Procurement.aspx> under ITB 17-01.
