

Transportation Element

Required Components:

- Major road improvements
- New roads
- Transit projects
- Pedestrian and bicycle projects
- Other elements of transportation network
 - Air
 - Rail

Stakeholder comments/issues from February 4th meeting:

1. Consideration of creating commuter parking lots
2. List “trouble spots” throughout the County to prioritize in requesting funds
3. Look at the bridges throughout the County, especially in regards to placing water/sewer lines across bridges
4. Evaluate evacuation routes
5. Examine congestion in Clemson and impact on Oconee County
6. Work to establish public transportation to DSS Building and other public services
7. Review/expand standards for internal traffic flow within developments
8. Look into the feasibility of traffic circles
9. Develop a “Big Box” Ordinance
10. Limit curb cuts along major roads and the distance between curb cuts
11. Implement Planning Commission review of developments in addition to administrative review
12. Create impact fees for new development
13. Development of design standards aimed at alleviating traffic congestion and avoid choke points (example: Highway 28 and side roads coming over railroad tracks)
